PROFILE

I am a .NET developer with experience in API integrations and in developing web and desktop applications. Since 2019, I have been working with HiFlow Solutions, delivering solutions for clients in the US and EU packaging and printing industries. I design and implement integrations with ERP, accounting, courier, and pre-press workflow systems, including Microsoft Dynamics 365 Business Central, Salesforce, Sage Intacct, QuickBooks Online, Freightview, Hybrid Software Cloudflow, and KSeF. I effectively use AI tools in the analysis and modernization of legacy systems, including migrations from Ruby on Rails and Microsoft Access to modern .NET and Blazor-based solutions. I am interested in working on new projects focused on web solutions, API integrations, and cloud technologies.

EXPERIENCE

.NET DEVELOPER present

HiFlow | March 2019 - present

I develop planning, SCADA, and PLM modules in web and desktop applications, and I deliver API integrations with ERP, accounting, courier, and pre-press workflow systems. I have implemented integrations with Microsoft Dynamics 365 Business Central, Salesforce, Sage Intacct, QuickBooks Online, Freightview, Hybrid Software Cloudflow, and KSeF. I work with .NET/C#, ASP.NET MVC, Web API, SignalR, Angular, React, WPF, WinForms, and MS SQL, and I also prepare SSRS reports and EDI solutions. On the security side of integrations, I work with OAuth, certificates, and document signing and encryption mechanisms. I also modernize legacy systems, including migrations from Ruby on Rails to .NET and from Microsoft Access to a Blazor-based solution on .NET 10. In these projects, I effectively use AI tools for legacy code analysis, migration planning, and accelerating implementation. On a day-to-day basis, I work closely with consultants and support customer requests, helping deliver and improve solutions efficiently.

.NET INTERNSHIP

KeepSkiller | October 2018 - February 2019

During my internship, I gained hands-on experience in developing desktop and web applications in the .NET ecosystem. I worked with C#, WPF, ASP.NET MVC, Web API, Angular, MS SQL, Entity Framework 6, and Dapper, and I also created unit and integration tests with xUnit. I learned MVVM and MVC patterns, DI/IoC, REST and WCF communication, and the principles of Clean Code, SOLID, and Scrum. As part of the training, I delivered a system for organizing study materials and reviews for students, including the database, business logic layer, a WPF application, and the web part.

EDUCATION

COMPUTER SCIENCE

Warsaw University of Life Sciences

September 2015 - June 2019

Specialization: Information Systems Engineering

SKILLS

C# / .NET | MS SQL | SSRS | Web API / REST / SOAP | WPF | ASP.NET MVC | OAuth 2.0 / JWT | Git / SVN | React | Angular | WinForms | SignalR | EDI | API Integrations | Doc signing

LANGUAGES

English - B2

Reading and writing technical documentation, confident communication.

INTERESTS

New technologies, practical use of AI in software development, physical activity, and sports events.

I hereby consent to the processing of my personal data for the purposes necessary to carry out the recruitment process in accordance with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 (GDPR).
